

## A 10-Day practical Step by Step. Financial Freedom Through Investing

Learn how to invest your money the smart and simple way. Most people think that investing scares them, and it shouldn't. Investing is scary only because you're investing incorrectly and it's costing you a lot of money. You should let your money work for you even when you are sleeping. Lance Knight is an amateur-turned-full-time investor and through this book of his, you will learn: To understand the stock market basics. What is the psychology behind market movement. Why some investors lose money in the market - and how to avoid becoming one of them. How you can expect to double your money every 7-10 years. How to choose high dividend-paying stocks and generating a stream of passive income that can tide you through retirement. How to have the confidence to manage your money for life. And many more of my experiences that have made me the fortune that I have today.
