

## The Secret of Livermore: Analyzing the Market Key System

The original work of Livermore was an much as enigma as the author himself. It was poorly written and almost deliberately confusing and hard to follow. This is not a surprise coming from a very secretive trader who refused to converse with people in the mornings so he would be left in pure set of mind not under undue influence of unwanted punters. The book was apparently written in 1940 at low ebb in Livermores life he was soon to commit suicide. Livermore wrote this book to promote a stock market advisory service that he was starting, to supplement his declining income. This book attempts to explain Livermores trading style; it also contains code of the Market key in Trade Station (EasyLanguage) and Wealth-lab wealth-script languages as well as flowchart and pseudo-code format. Download the CD-ROM (all the source code in the book and more) after the purchase for free. Instructions in the book.
