

Work Wealth Work

From the PREFACE: The goods and services that constitute our national income are valued severally and collectively with a fair amount of accuracy in terms of money. For a gold standard, though by no means perfect for the work of monetary measurement, is stable and has a single definite meaning to all men. By means of it we can estimate the rates of growth or decline in our industry, as an aggregate or in its several departments, and the quantities of output and consumption of the various products. We can compare the growth of our national wealth with that of other nations.
