

This introduction to electronic mass media balances coverage of cutting-edge new technologies with the history, regulation, and programming topics that are equally important in providing students with a strong foundation for future careers. The text offers broad-based coverage of business structures, sales and economics, radio and television programming, and broadcast news, as well as an up-to-date look at transmission technologies, both audio and video systems, and electronic media distribution technologies. A unique Part IV examines media and media systems in other countries, as well as research into how the media affect our society.

Life in a Roman Fort (Picture the Past), Strike Out the Side (Game On!), Acadia National Park: Eye of the Whale (Adventures with the Parkers), Princess Academy, Zeus (Gods and Goddesses of the Ancient World), The Haunted Tower (Puzzle adventures), Unstoppable Octobia May - Audio Library Edition, Unified Symmetry 1 (The Language of Science) (v. 1),
