

## THE ORIGIN DEBATE

It does matter. The false religion promoted by school systems and the media around the world has caused a decline in the morals of many nations. Generations of misleading, even false science teaching has created an apathetic population without a clear understanding of history or hope for the future. I am neither theologian nor highly educated scientist but, I have read their words and found that those re-inventing the Bible are highhandedly pushing their made up version of science while denying any argument, or even this debate, in public schools. The scientific definitions are provided by highly educated professors, creationist and evolutionist. There is an interesting difference, And it does matter.
