

This volume brings together some of the best recent scholarship on what might be termed Einsteins formative period, that is, the thirty years before he obtained his first academic position in 1909. Topics covered include Einsteins early reading and his university education, his early views on scientific method and some of the crucial philosophical influences shaping those views, his early work on statistical mechanics, Brownian motion, quantum theory, relativity theory, and his youthful vision of a unified foundation for physics. Seven of the eight papers appear here in print for the first time. The contributors draw extensively upon much of the interesting new documentation, such as personal letters, including love letters to his fiancée, and unpublished manuscripts, that has come to light in the course of work on the first several volumes of *The Collected Papers of Albert Einstein*. This engaging book examining the young Einstein from a variety of perspectives---personal, scientific, historical, and philosophical--- will be accessible to a broad general readership.

Making Your Consultancy a Business: Not a Job (Consultants Guide: Setting up and running your consultancy profitably and painlessly Book 10), Come What May (Turtleback School & Library Binding Edition) (Heartland (Prebound)), Vanishing Act, Little Dinosaur (Little Shimmers), Blueprint For Public Relations, Botanica Erotica: Arousing Body, Mind, and Spirit, The US Nursing Home Industry (Contemporary Industry Studies),
