

## Art and Artists (The Independent Dragons from Bali Book 6)

The Independent Dragons from Bali is a 7-part series of short stories, with Art and Artists being the sixth in this set of novelettes, each an engaging length for enjoying with an extended lunch or, if you're an especially quick reader and a prudently slow drinker, your tall morning latte. The Series Imagine sharing the land with an equally intelligent species, one with many of the capabilities of humans. A species that has a robust immune system and a very long lifespan, yet even with these advantages somehow manages to keep their global population at a sustainable level. And add to all this the ability to actually fly. These creatures are dragons, but aren't demonic looking, don't have a forked tongue or spaded tail, and are incapable of breathing fire. But they do have an opposable digit, grasping items nearly as well as their human counterparts. They can also hold their breath underwater far longer than the best human swimmer, particularly useful when your diet depends heavily on fresh fish and seaweed. Because of their lifespan and ability to mentally communicate through images, they've had no need for writing, but this lack of a written history is why they've ultimately fallen behind human technology. Which leads to the disquieting question: can they truly endure going forward? Art and Artists The series next to last story is about Mollie finding a way to continually populate her school with new students. A few schemes are devised, but in the end it is all about interesting dragons in what's possible if they accept the majesty of reading. Mollie and her co-teachers know they have to present their case in a less lofty way, and Mollie travels home and then to her island port to once again seek the advice of her teacher friends in both places.
