

From New Baseball Pitches to Natural Cures And Much More (Second Edition)

Due to the great success of the first edition I decided to print a second edition. The second edition contains a great deal of new information. The first chapter on baseball is much more complete and will be of interest to all baseball players and coaches from the little leagues to the major leagues. This will be of great interest and informative to all women who are also involved in baseball as players or who have children that are involved in baseball. It is a must for any baseball player who wants to play major league baseball or for baseball players who have played major league baseball and want to improve their game. The baseball players from the International baseball League who I have showed my book to went crazy over it. The chapter on medicine is also expanded to give more information concerning remedies that most people would be interested in. If you use only one of these possible cures it would be worth a hundred times the cost of this book. These remedies cannot be found any where else to the best of my knowledge. The chapter on cooking contains recipes that were handed down in our family for many generations. One of the closest friends of our family was the executive chef for the Chalfant Haddon Hall in Atlantic City in the 1930s. He was also the executive chef at the Ambassador Hotel in Miami at the same time. He gave me some of the recipes in this book. There are also information on patents that many people will find of great value. The chapter on nightmares will also be value to soldiers who are returning from war and are suffering from post traumatic stress.
