Example 2. What is the value of 5763 yards of trimming, at 3 farthings per yard? In this example 1 divide the given number 2,0) by 16, as before directed, as 3 farthings is the 16573(3.0 sixteenth part of a shilling, and the quotient---- is 360 shillings, which reduced into pounds is.5 18/. os. id. for the 3 that remains in the first t division is 3 sixteenths of a shilling, or 3 times--3 farthings, equal to id. ffu. 3. What comes 445, at d.?--Ans. o/. 3?/. S. 4. What is the value of 3370, at i. 1--Anf, 7/. 5/. Cafe 3. When the price of the integer, is pence and farthings, and not an aliquot part of a shilling, find what aliquot put of a shilling is the nearest to the given price, and less than it, and divide the given number by that aliquot part; and--for the remainder of the price consider what part it is of ):the i i-----Case 4. When the price is any number of shillings under 20. First. If it be an even number of (hillings, multiply the given number by half the price, and double the first figure on the right hand, which will be shillings, aud allthe other figures are pounds. Secondly. If the price be an odd number of (hillings, multiply the quantity by half the next less number, which will be an even number, then for the odd shilling add-j% of the given number to the last product, and the sum of these two quantities will be the answer.
