

Log transportation in the lake states lumber industry 1840-1918. The movement of logs and its relationship to land settlement, waterway development, railroad construction, lumber production and prices.

Log transportation in the lake states lumber industry 1840-1918. The movement of logs and its relationship to land settlement, waterway development, railroad construction, lumber production and prices.

Fascinating history of the logging industry in Wisconsin and other states around the Great Lakes when it was the central timber producing region of the country. The book details the movement of the logs and the industry's relationship to land settlement, waterway development, railroad construction, lumber production and prices. With chapters on loggers, driving, damming, marking, booming, log rafting, the law of the waters, narrow gauge logging railroads, the business structure and changes in the 20th century. Illustrated with frontispiece and 5 graphs. With appendices, extensive bibliography and index. This is Volume IV of the American Waterways Series. 352 pages.
