

This volume collects numerous recent advances in the study of stratified fluids. It includes analytical and experimental work from a wide range of fields, including meteorology, limnology, oceanography, and the study of estuarine processes. It also includes fundamental research on stratified and rotating fluid dynamics. A compendium of current work, the book is an ideal starting point for future research.

The New Capitalists: How Citizen Investors Are Reshaping the Corporate Agenda, Drillex: Papers Presented at the Conference Organized by the Institution of Mining and Metallurgy and the British Drilling Association, Stoneleigh, Warwickshire, England, from 7 to 10 April, 1987, Public Relations und? Risikomanagement (German Edition), Los Cocodrilos = Crocodiles (Animales Depredadores) (Spanish Edition), Texts for Sharing: Bk.1 (Books for sharing), Airline Marketing and Management, A to Z Mysteries: The Absent Author, First Contact (Point SF),
