

Noise Control Basics & Acoustical Product Directory 2016: : a Practical Guide for: Room Acoustics, Sound Isolation, Environmental Noise, Mechanical Noise

Noise Control Basics & Acoustical Product Directory 2015 is a practical guide complete with lists of product suppliers and manufacturers in the United States to take your project to completion. It provides basic information about applying acoustical engineering to solve problems and how to get the projects done at a reasonable price. The directory covers acoustical absorption, sound isolation, sound barriers, impact insulation treatments, mechanical noise suppression, acoustical doors and windows, and sound measurement equipment and software. The main acoustics issues addressed are: Room Acoustics, Sound Isolation, Environmental Noise, and Mechanical Noise. There is information about the acoustical descriptors and calculations. Acoustics is a critical part of many types of projects - architectural and environmental. Applications can include hearing conservation, speech intelligibility and privacy, sound quality, mechanical noise, and environmental noise regulations. Types of projects can include: schools, churches, condominiums, roads, theaters, hospitals, manufacturing facilities, rail, airports, shooting ranges, With tools and resources, many projects you can handle by yourself. If you need any assistance or if you have any comments or suggestions, please contact Noise Expert: beth@noiseexpert.com
