

## Achievement and Opportunity in the Oil Industry

The development of the North Sea oil fields has now been under way for over two decades. This book gives an up-to-date view by authoritative figures in the oil industry of the next phase in the North Sea and other opportunities around the world. Experience and achievements on the UK Continental Shelf are reviewed and future requirements are identified. Representatives of other related areas of industry describe their own experience and demonstrate the positive response required to continue the development of the oil industry. The book is the result of a conference sponsored by WESCON 84 and held in Glasgow 11 - 13 September 1984.
