

## The Hidden Domain: Home of the Quantum Wave Function, Natures Creative Source

Did you know that our everyday world arises from an invisible ocean of unlimited energy that surrounds and permeates us? That all events exist in potential form in this ocean, and certain ones are selected to be manifest in our reality? That this domain is the source not only of our universe but innumerable other universes as well? In *The Hidden Domain*, the continuation of his very popular *Bridging Science and Spirit*, Norman Friedman explores this realm using non-mathematical concepts that are solidly grounded in science. Ideas from physicists, from religious and philosophical sources, and from Seth (the discarnate entity brought to us by Jane Roberts) illuminate this intriguing depiction of the world that underlies all experience. **BOOK**

**REVIEWS:** I think *Bridging Science and Spirit* is one of the most insightful, comprehensive, and brilliant expressions of knowledge. I shall certainly use it as a reference guide. Many abstract ideas that I was not comfortable with are now more meaningful. Deepak Chopra, M.D., author of *Ageless Body, Timeless Mind*; *The Seven Spiritual Laws of Success*; *The Way of the Wizard* *Bridging Science and Spirit* accomplishes a formidable task. This book will be a valuable research document for many years to come for those concerned with a perspective that honors both science and spirituality. Fred Alan Wolf, Ph.D.; author of *Taking the Quantum Leap*; *Parallel Universes*; *The Physics of the Soul* *Bridging Science and Spirit* correctly asks, How does matter originate from consciousness? This is the fundamental question of a growing body of literature regarding the new paradigm of an idealist, consciousness-based science. Norman Friedman has made an important and thoughtful contribution to this new science.

Amit Goswami, Ph.D., Professor of Physics, University of Oregon; author of *The Self-Aware Universe* A masterful job

of bringing innate psychic understanding and scientific knowledge together, brilliantly showing us how all is one and one is all. Robert F. Butts - Husband of Jane Roberts, Channel for Seth Few have understood both science and metaphysics well enough to remove our blinders to their underlying similarities and universal truths. Kudos to Norman Friedman for proving to be a master bridge builder. Lynda Madden Dahl, Co-founder, Seth Network International; author of eight Seth-based books, including the Living a Safe Universe Series An insightful synthesis of the outer frontiers of theoretical physics with the deep revelations of mystical insight, throwing important light on the reality we live in. Peter Russell, author of The Global Brain; The White Hole in Time; The Global Brain Awakens Some future historian will, I feel confident, identify the Great Debate of the twentieth century around the question: What is science going to do about consciousness? I would surmise that Norman Friedmans book Bridging Science and Spirit will turn out to be a benchmark in that inquiry. No one can read it without gaining some clarity on their own nature. Willis Harman, Ph.D., President, Institute of Noetic Sciences; author of Global Mind Change A brilliant synthesis of ageless wisdom and modern science. Friedmans writing provides pictures for our minds so we can see reality. Montague Ullman, Ph.D., Clinical Professor of Psychiatry, Emeritus, Albert Einstein College of Medicine, N.Y. I responded to this book with both admiration and appreciation for the task Norman Friedman set out to do and accomplished so successfully. He has paved the way toward a deeper understanding of the role of consciousness in the creation and structure of matter. Jacquelyn Small, MSSW, President, Eupsychia, Inc.; author of Awakening in Time; Transformers, the Artists of Self-Creation
