**SlideShare** The critical path method (CPM), or critical path analysis (CPA), is an algorithm for scheduling a set of project activities. It is commonly used in conjunction with the program evaluation and review technique (PERT). In project management, a critical path is the sequence of project network activities which add up to the **Chapter 10 Project Management with PERT/CPM Project Scheduling: PERT/CPM** The critical path method, a project management technique created in the 1950s, allows .
