

The Meaning And Method Of Spiritual Life

IN considering the meaning and the method of the spiritual life, it is well to begin by defining the meaning of the term spiritual, for on that there exists a good deal of uncertainty among religious people. We constantly hear people speaking of spirit and soul as though they were interchangeable terms. Man has a body and soul, or a body and spirit they say, as though the two words spirit and soul had no definite and distinct meaning; and naturally if the words spirit and soul are not clearly understood, the term spiritual life must necessarily remain confused. But the Theosophist, in dealing with man, divides him in a definite and scientific way both as regards his consciousness and as regards the vehicles through which that consciousness manifests, and he restricts the use of the word spirit to that Divine in man that manifests on the highest planes of the universe, and that is distinguished by its consciousness of unity. Unity is the key-note of spirit, for below the spiritual realm all is division. When we pass from the spiritual into the intellectual we at once find ourselves in the midst of separation.
