I believe that whatever we do or live for has its causality it is good, however, that **Determinism - Wikipedia** Determinism is the philosophical position that for every event there exist conditions that could cause no other event. There are many determinisms, depending on what pre-conditions are considered to be determinative of an event or action. Deterministic theories throughout the history of philosophy have sprung from Determinism often is taken to mean causal determinism, which in physics is **Trans-Scientific Frameworks of Knowing:** Jan 17, 2017 Section 1 outlines the scope of both fields, and how they are related. 1.1 A brief history of the field of science and religion also ordained clergy (e.g., the physicist John Polkinghorne, the biochemist Arthur Peacocke, themes of the field, including a comparison of methodology and theory in both fields. **Real Dispositions in the Physical World - Generative Science** Volume 361. 2012.
