With the new affluence & power of women in comparison to that of men, there will be much reversal of roles. Women in big jobs earning most of the money will need men who bring creature comforts, moral and domestic support. Statistics show that in five years there will be one million more women than men with advanced degrees! The futurists unanimously agree, The future belongs to women. In light of this, I would like to make a forecast of what male-female relationships will be like. Will it be a simple reversal of women oppressing men as men have oppressed women, or is it going to be something different? I believe it will be something different. Heres how I see it.
