

The Point of Power: Change Your Thoughts, Change Your Life

The Law of Attraction states that whatever you focus on and intend in your life, shall be delivered to you. The author illustrates the three principles that explain how to operate the law-intend, declare, and detach-and reviews the insights of quantum mechanics. Examples, including some from the authors life, help illustrate the steps. Every day, many people wish for their lives to be different. They can picture a new life, yet their ego really focuses on what they do not have or cannot get. This sets up resistance to the new life they seek. Discerning the lack (that is the basis of resistance) as the contrast to what one seeks can lead to desire, which then can become an intention and attention to the beliefs and emotions of already having it (detachment). Baksa has also consulted the many wisdom and spiritual texts in order to hone his three-step process.
