

CONTENTS. I. General principles. Theory of free electrons p1 II. Emission and absorption of heat p68 III. Theory of the Zeeman-effect p98 IV. Propagation of light in a body composed of molecules. Theory of the inverse Zeeman-effect p132 V. Optical phenomena in moving bodies p168 Notes p231 Index p340 PREFACE. The publication of these lectures, which I delivered in Columbia University in the spring of 1906, has been unduly delayed, chiefly on account of my wish to give some further development to the subject, so as to present it in a connected and fairly complete form; for this reason I have not refrained from making numerous additions. Nevertheless there are several highly interesting questions, more or less belonging to the theory of electrons, which I could but slightly touch upon. I could no more than allude in a note to Voigts Treatise on magneto-optical phenomena, and neither Plancks views on radiation, nor Einsteins principle of relativity have received an adequate treatment. In one other respect this book will, I fear, be found very deficient. No space could be spared for a discussion of the different ways in which the fundamental principles may be established, so that, for instance, there was no opportunity to mention the important share that has been taken in the development of the theory by Larmor and Wiechert. It is with great pleasure that I express my thanks to Professor A. P. Wills for his kindness in reading part of the proofs, and to the publisher for the care he has bestowed on my work. Leiden, January 1909. H. A. Lorentz.

The Three Elephants and The Case of the Mysterious Ship: A poem about greed and disunity, The American Consumer: Decision Making for Todays Economy, Public Relations im Krankenhaus, Land of the Long White Cloud: Maori Myths and Legends, The Lion Hunts in the Land of Kachoo, Sales management: A tactical approach (Priorities in marketing series), Comment la chenille devient papillon: La prospection MLM en 4 etapes (French Edition), The Real Paul: Recovering His Radical Challenge, Automobile sales management practical charts,

The theory of electrons and its applications to the phenomena of The theory of electrons and its applications to the phenomena of light and radiant heat. by Lorentz, H. A. (Hendrik Antoon), 1853-1928. **The Theory Of Electrons And Its Applications To The Phenomena Of** edition. This pdf ebook is one of digital edition of The Theory Of. Electrons And Its Applications To The Phenomena Of Light And Radiant Heat.
