

The World with Zero Postulation: Unraveling the Mysteries of Nature...

A World with Zero Postulation is a landmark book that tells the story of the development of our understanding of the universe in as simple terms as it can be said in. Embark on an incredible journey through time, as human understanding of science journeys from the ancient age, through the medieval age, to the present age. It explains the very recent developments in the world of science in general and of physics in particular in laymans terms. Learn about blackholes, the progress in the String Theory and about the Abstraction Theory. This books sheds new light on the works of the well-known greats like Albert Einstein, Isaac Newton, Galileo Galilei, Richard Feynman, Ashoke Sen, Roger Penrose, Stephen Hawking.
