

Coincidence Is No Coincidence

Coincidence strikes us as remarkable and meaningful when two or more events come together in a surprising way, largely because there appears to be no apparent cause or explanation. Asking why and how Coincidences happen leads us to discover they are actually the outward expression of a much larger paradigm of Parapsychological Phenomena, or psi for short. A quasi-scientific analysis of why and how psi events happen leads to an amazing world of Quantum Mechanics, Chaos, Relativity and Superstring Theories. There one finds the entire universe is overlain by an informational energy field which may be viewed as the atemporal aspatial UltimaNet on which resides details of everything that has ever happened, is happening and will happen. A sensitive individual, normally in an Altered Start of Consciousness, may upload and download such information as a transceiver, as if by Extrasensory Perception. This recent analysis of over one thousand Personal Accounts from people all over the world (four hundred are given here) shows how common these phenomena are and illustrates how incredibly complex and powerful the human mind, the Quantum Mind, really is. People frequently experience apparent Coincidences behind which lie cases of Clairvoyance, Precognition, Premonition, Telepathy, OBE, NDE, Divine Intervention, Dreams that come true, and various other forms of psi. These experiences may be just for entertainment value or become harbingers of significant life-altering events.
