

Big Cats Are Not Pets! (When Pets Attack!)

All cats are incredibly cute when they're kittens and cubs. But when they grow up, wild cats are not so cuddly. Yet, some people keep big cats such as lions, tigers, and leopards as pets. They think they can tame them, but a wild animal is always wild, and many big cats owners are responsible for the deaths of people when their pets attack. This book describes the attributes of big cats that make them unsuitable pets. Readers discover the reasons why it's more humane to leave these exotic animals in their native habitats than to cage them.
