

## Zebra Tales: Mommys Baby (The Wisdom of Mr. Stripes Book 5)

Sibling rivalry often starts after the birth of a second child. Sometimes the older child becomes aggressive or even regressive. This means they start acting like a baby again. It is important to prepare your child so they know what to expect. This makes their adjustment to the changes a baby brings easier. Children with the closest relationships with their mother often have a harder time after the baby is born. They worry that the love they share will be taken away and given to the new baby. They want to know where babies come, from, and why is mommy so tired. Zebra Tales-Mommys Baby is the 5th book the Wisdom of Mr. Stripes series. This book addresses many concerns a older sibling has with a new addition to the family. The book identifies that babies come from Love - then through a mom and dad. This gives a much deeper context to understand life from. To help an older sibling to adjust to changes set aside a special time just for them. It is important to listen to them as they share their feelings. Encourage them to help care for the baby in little ways. Point out the benefits of being the older child. While they have a new play mate to look forward too, make sure they understand a new baby sleeps a lot and cries and will change the daily routine. Mom will be tired for a while. Clear communication, patience and understanding will help in a transitional time.
